FOR IMMEDIATE RELEASE

New and Improved Templates Added to the Project Management Template Library

CVR/IT Consulting LLC introduces new tools that support Project Manager, Risk Manager and Business Analyst

Raleigh, NC January 14, 2012 – Available immediately, the CVR/IT Consulting Project Management [Template Library](#) now features new expansions and updates. Six new templates support the work of [risk manager](#) (Comprehensive Risk Register with Cost Analysis – CRRCA[®]; Opportunity Discovery Template; Risk Identification Tool), [business analyst](#) (Project Requirements Document), and [project manager](#) (Preliminary Project Cost Estimator; Project Charter Business Requirements). In addition, twenty four existing templates have received significant upgrades in both function and ease of use.

Templates in the library now support all project phases, every knowledge area and the full range of project management work, from fundamental to advanced. New and updated templates are unique in offering integration of Project Management and Business Analysis concepts and terminology. All templates are PMBOK[®] and IIBA[®] compliant.

The Project Management Template Library now contains well over 90 templates while the price of the library remains surprisingly low, making it one of the most cost-effective sources of project templates available today.

Jason Charvat, in his book [Project Management Methodologies](#), calls project templates "essential to the success of any project. Templates are seldom found bundled together nicely in a box, ready for use. Project or development managers do not want to spend the time to create new project templates for their projects. Instead, they benefit greatly from using a wide variety of tried and tested methodology templates, which gives them time to concentrate on the actual project."

[Dr. Gary J. Evans PMP](#), author of the Template Library, brings over two decades of project management and business analysis experience to the development of CVR/IT Consulting's extensive collection of project management tools.

The new templates are available immediately on the company's web site: www.cvr-it.com
